The indoor climbing wall is a simulated rock formation with numerous hand and foot holds that provide mental and physical challenges to build strength, endurance, and self-confidence. The bouldering wall is climbing without ropes. It is a great way to learn climbing techniques and gain strength.

Intramural sports have been a campus tradition at ECU for over 50 years. Students play with their friends or organizations and compete against fellow Eastern students. Examples of activities offered are flag-football, soccer, volleyball, corn hole, dodge ball, golf, basketball, and much, much more. There are also numerous individual and dual events.

Campus Recreation is excited to offer **Massage Therapy.** These days massage isn't just for feeling good anymore. It is a holistic therapy that reduces the heart rate, lowers blood pressure, increases blood circulation and lymph flow, relaxes muscles, improves range of motion, and increases endorphins, the body's natural painkillers. Therapeutic massage enhances medical treatment and helps people feel less anxious and stressed, relaxed yet more alert. It had been said that, "Massage is to the human body what a tune-up is for a car."

Campus Recreation employs a licensed massage therapist who offers several types of massage therapy:

- **Myofascial Release** is a gentle therapy, consisting of a mixture of light stretching and massage work. During a session, the therapist will apply hands-on massage strokes in order to release tension from the fibrous bands of the muscles, bones, nerves and joints, by unblocking any scar tissue or adhesions due to injury in the muscles and surrounding tissues.
- **Deep Connective Tissue Massage** is a form of intense massage that aims to release myofascial (connective tissue) restrictions in the body, and to break up any restrictive scar tissue. It has also been known to help relieve chronic tension, to increase the body's range of motion, to improve posture and to enhance the natural harmony of the entire body and mind.
- **Cranio-Sacral Therapy**, or CST, is a gentle, hands-on manipulation of a physiological body system called the cranio-sacral system. This system is comprised of the soft tissue and bones of the cranium (or head), the spine and the pelvis. Massage therapists that perform cranio-sacral therapy also target the membranes and cerebrospinal fluids that surround and cushion the brain and spinal cord from injury during a therapy session.

- **Therapeutic Massage Therapy** is a general term for medical or therapeutic treatment by massage. It is considered a holistic therapy as it reduces the heart rate helping to relax all the muscles of the body. It also helps lower blood pressure, improves blood circulation, improves the lymphatic system, and increases the release of the body's natural painkillers (such as endorphins).
